

LABvault-SD

Advancing the Medical Industry through Digital Video

SPECIALIZED Solutions for
Advancing Digital Video

LEIGHTRONIX

Advanced Digital Video Documentation

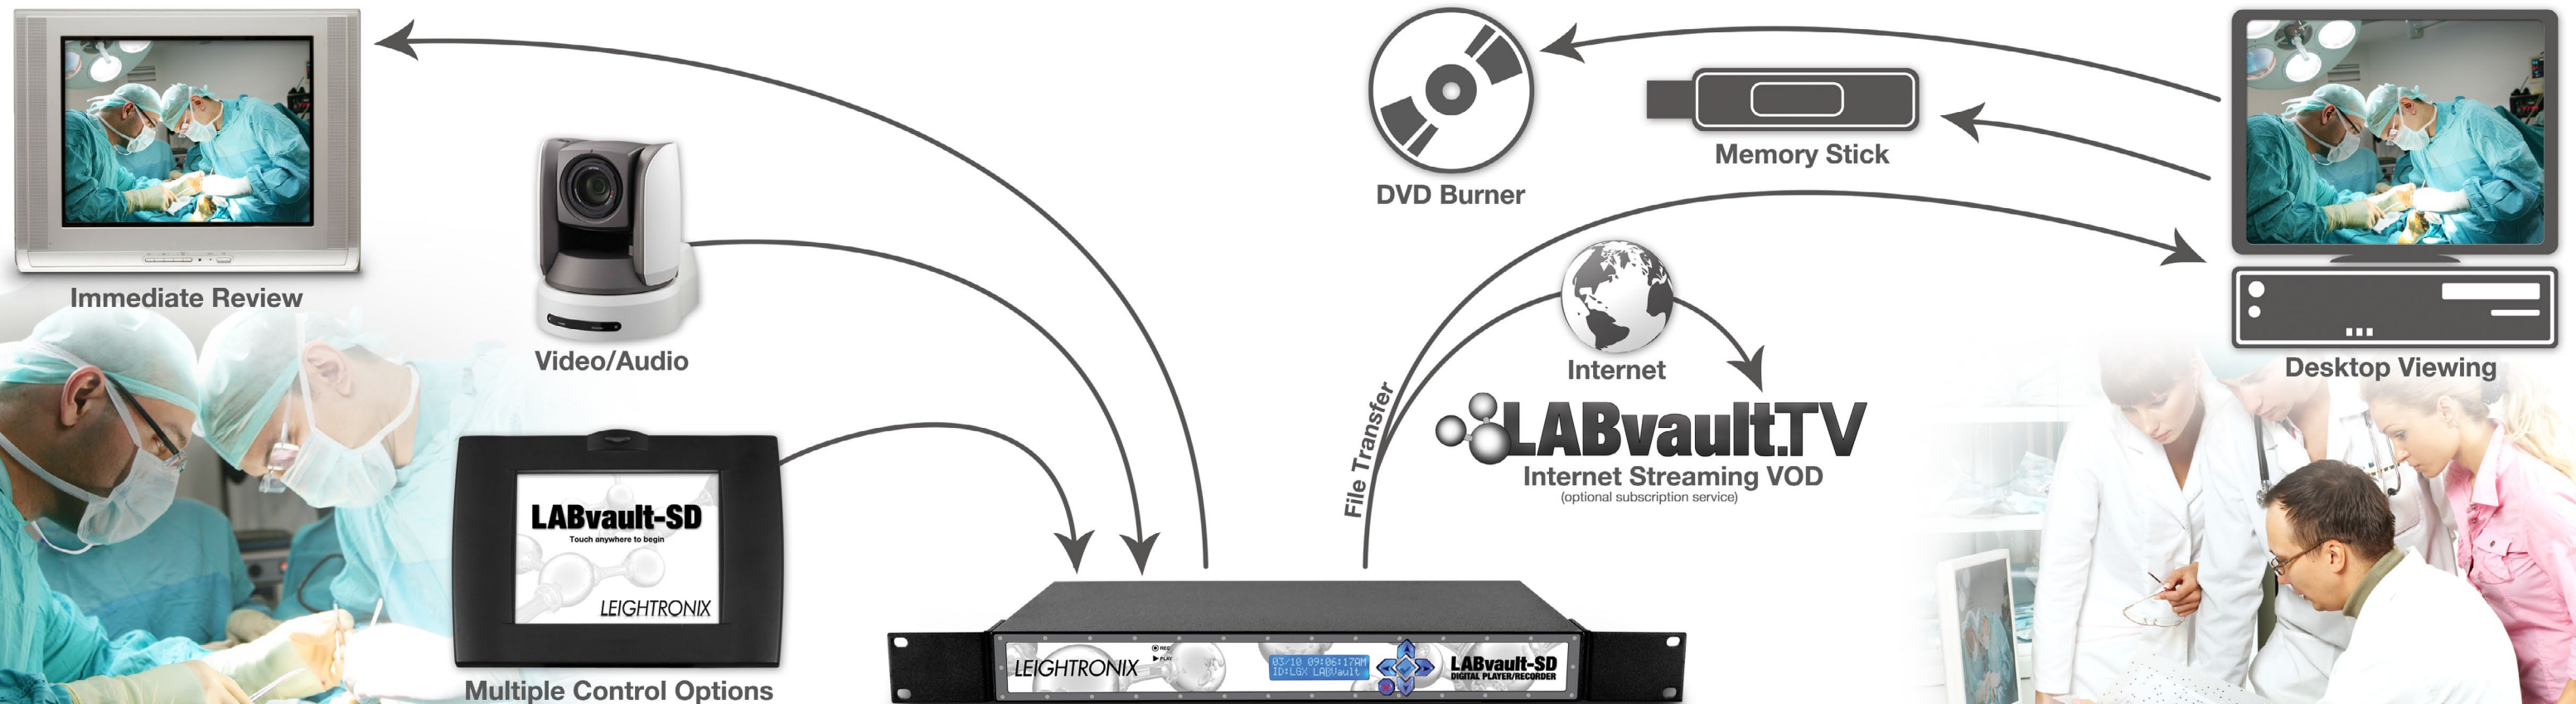

Capturing and archiving procedures through video, can be easily accomplished using the LABvault-SD. This digital video recorder and player is optimal for use in applications that require video documentation of procedures performed in surgical rooms. Offering an array of remote control options aimed to suit operational policies within any medical facility, medical professionals can now get a fail safe recording of every surgery and procedure with the touch of a finger, wave of a hand, or even by touching ones foot on a floor pedal.

The LABvault-SD's ability to provide a reliable way to record and archive video while offering customized and convenient options to review recorded media makes it an ideal solution for any medical facility. Whether the documented video is reviewed for educational purposes or archived for matters of legality, the LABvault-SD is the safe, secure, and reliable way to capture, review, share and archive all captured digital media.

Features and Functionality

- **Flexible Control** — With Internet based, touch screen and other external control options, creating a digital video record of any procedure has never been easier.
- **Reliable Video Capture** — Hassle free hardware makes video capture fool proof, ensuring you always get a complete and fail safe recording. Media can be captured up to a full 24 hours at a time.
- **Ample Accessibility** — Reviewing of media can be done live, immediately on a local monitor, or remotely using DVD's and flash drives, on an internal network, or with Internet based streaming video-on-demand, hosted by LABvault.TV™.
- **Innovation** — Advanced digital video, networking, and display technologies made to empower the medical industry.
