

MINI-T-NX

Video Server/System Automation Checklist

Everyone can go digital with the MINI-T-NX™. The ultra low cost of this amazing video server makes digital automation affordable for any television operation. Use the checklist below to compare the MINI-T-NX to other systems you may be considering and discover the unmatched value of this complete playback solution.

Feature/Cost Comparison	MINI-T-NX		Other System	
	S=Standard O=Option	Item Cost	S=Standard O=Option	Item Cost
Controller/System Base Price		\$5,495		
Digital Video Playback (hardware MPEG decoder)	S	\$0		
Digital Record Channel (hardware MPEG encoder)	S	\$0		
Internal Hard Drive Storage for Hundreds of Programs and Clips	S	\$0		
Integrated High-Speed Ethernet Port	S	\$0		
TCP/IP Network Access and Control via LAN, WAN, or the Internet	S	\$0		
High-Speed, All-Digital "Total Import™" of DVD Program Material to Video Server	S	\$0		
Integrated Digital Video Messaging	S	\$0		
★ Automated "Total Backup" of Digital Media and System Files to Local or Network Drive	S	\$0		
★ Two Infrared DVD/VCR Control Cables (IR transmitters included) for External Device Control	S	\$0		
★ Support for as Many as 8 PRO-BUS™ (legacy) Device Interfaces	S	\$0		
★ Support for DVD Players from JVC, Panasonic, Pioneer, Sony, and Tascam	S	\$0		
★ Support for VCRs from JVC, Panasonic, and Sony	S	\$0		
★ Internal 7 x 2 Video and Audio Switcher with Video-Loss Detection (1 Program Output, 1 Preview Output)	S	\$0		
★ Comprehensive Media Library with Support for Mixed Media Formats (MPEG, JPEG, DVD, & Videotape)	S	\$0		
★ Easy Drag and Drop Scheduling with Error Checking and Conflict Reporting on all Supported Media	S	\$0		
★ Five-Year Parts and Labor Warranty (cost for five years)	S	\$0		
★ Software and Firmware Updates (cost for five years)	S	\$0		
Rack Mountable - One Rack Unit	S	\$0		
Controller/System Cost (suggested list price, five years of ownership)		\$5,495		

Other Considerations	MINI-T-NX	Other System
★ Safety Tested and Approved as a Product, Not as Individual Components (UL 60065, CAN/CSA E60065)	✓	
★ Compliance Tested and Approved as a Product, Not as Individual Components (FCC Part 15, Class A)	✓	
★ Designed and Manufactured by a Company with over 25 Years of Industry Knowledge	✓	
★ Products are Designed from the "Ground Up" for Automation, Not Converted from a PC	✓	
Sold and Supported at Local, Regional, and National Levels	✓	

★ LEIGHTRONIX Key Features

Affordable ♦ Versatile ♦ Reliable
Cable and Broadcast Solutions

LEIGHTRONIX, INC.
Video Servers • Television Automation

The MINI-T-NX™ continues the LEIGHTRONIX MINI-T series tradition of quality, low-cost television automation yet delivers something new—DIGITAL VIDEO. We've added digital video playback and internal hard drive storage to our popular

MINI-T controller to create a digital playback solution for any local television operation, regardless of budget constraints. The MINI-T-NX is a powerful, all-in-one package that offers digital video playback, digital video messaging, DVD/VCR control, and video/audio switching.

Server

Until now, digital video at such a low price was unheard of for a “total” playback solution. With a built-in digital video server, the MINI-T-NX is ready to play industry standard MPEG-2 video/audio files, allowing you to take full advantage of the many benefits of digital file based playback. The high-speed Ethernet port ensures fast transfers of digital media files to the internal hard drive storage.

Digital Video Messaging

Need video messaging? No need to look any further. Simply upload your JPEG video slides to the MINI-T-NX and synchronize your messages with program playback. Create dynamic video slide shows and quickly and easily fill gaps between programs. Upload slides into user folders to create personalized, individual slide shows.

Device Control

Not quite ready to abandon your legacy playback equipment? The MINI-T-NX provides versatile device control and includes two internal, infrared control interfaces (with IR transmitters) right out of the box. The IR control ports are user-programmable for operation with a wide range of DVD players and VCRs from JVC®, Panasonic®, Pioneer®, Tascam®, and Sony®. PRO-BUS™ interfaces allow control of additional DVD and videotape equipment (interfaces sold separately).

Switching

The MINI-T-NX has your signal routing needs covered with a built-in, video and audio switcher with video-loss detection. The internal switcher provides the necessary video/audio switching capabilities for handling DVD and videotape playback, and other pass-through resources such as satellite or studio feeds.

Warranty

A company's warranty coverage is a good indicator of its experience and confidence. That's why LEIGHTRONIX has given the MINI-T-NX a five-year factory parts and labor warranty. Only those serving an industry for the long run are willing to make such a commitment to its customers.

Software Updates

Annual charges for software updates have become commonplace for many video automation manufacturers, but not with LEIGHTRONIX. Software and firmware updates are provided free to registered users for the life of the product.

Product Safety and Compliance

Product certifications often seem unimportant—that is, until someone wants proof your system meets regulatory standards. In many cases, commercial equipment placed into public or private settings are subject to local, state, and even federal mandates that require certificates of product safety and emissions testing. LEIGHTRONIX products are tested and approved, carrying the marks of both ETL product safety and FCC compliance.

Local Sales and Support

LEIGHTRONIX products are sold and supported through local dealers of professional and broadcast video equipment. Your purchase is backed at local, regional, and national levels.
