LEIGHTRONIX UltraNEXUS-HD Series Video Servers Diversified into Multiple Products

New products include: UltraNEXUS-HD X2, UltraNEXUS-HD Flex, and UltraNEXUS-HD Cast

Mason, MI — October 26, 2017 — Furthering its continued success, the flagship LEIGHTRONIX high-definition video server, the UltraNEXUS-HD™, has evolved into three distinct products. Each version has specifications and pricing scaled to the specific needs of end users in a response to current and future broadcasting trends throughout North America.

The UltraNEXUS-HD X2 retains all of the features from the original 1RU UltraNEXUS-HD and adds additional internal hard drive space, totaling 2TB, while dropping the price point down to \$10,995.00. With similar features and an internal 1TB hard drive, the UltraNEXUS-HD Flex has an even lower price point of \$8,995. The UltraNEXUS-HD Cast gives broadcasters a formidable playout solution for \$7,995.00.

“LEIGHTRONIX has been a leader in this industry for over 36 years because of our remarkable products, our unparalleled support, and of course, our hardware’s impressive life span,” LEIGHTRONIX Vice President of Sales Scott Morrison said. “However, a key element in our success has been our close interactions with customers. We’ve maintained a leadership role in the industry by listening and constantly adapting to the unique requirements of our individual users’ workflow while being fully conscientious of the constraints of their budgets.”

All of these new products coupled with the UltraNEXUS-HD Blade™ video server, which holds up to 12 channels in a 4RU chassis, further the company’s mission to accommodate broadcasters with flexible and affordable HD/SD options for broadcast and streaming.
