NEXUS VIDEO SERVER CONTROL CAPABILITIES EXPANDED

Powerful Video Server Now Supports Multi-Disc DVD Players/Changers

Holt, MI. — November 1, 2007 — LEIGHTRONIX today announced new device control capabilities for the NEXUS® video server and system controller, adding support for advanced control of multi-disc DVD players/changers.

The already powerful NEXUS is enhanced with a low cost, high performance option for controlling select Sony® and Pioneer®, multi-disc DVD players. With support for up to 400 DVDs, the control option adds hundreds of hours of playback capacity to NEXUS systems, providing television operations even greater flexibility and control in DVD playback. Media centers that receive a high volume of import programming on DVD can now conveniently load their discs into one player and then use the NEXUS multi-disc control option to schedule playback without stopping to import or ingest DVD content.

Fully programmable, the NEXUS provides 100% unattended operation for playback from multi-disc DVD players/changers. Advanced control capabilities include disc selection and random disc access with program selection via title:chapter. Powerful WinLGX management software accompanies the NEXUS and provides the user with a comprehensive interface for easily organizing and controlling thousands of digital media, DVD, and videotape titles.

Multi-disc control is available as an option for new and existing NEXUS systems and has a list price of \$495.

About the LEIGHTRONIX NEXUS

In 2005, the NEXUS was released, starting a new revolution in playback automation and video server technology. In less than two years, the NEXUS has become one of the most popular, comprehensive system control/television automation solutions for local broadcast, cable television channels, and in-house communication networks. Unmatched in price and performance, the NEXUS remains the industry standard for product value.

About LEIGHTRONIX, INC.

LEIGHTRONIX has over 20 years experience in video equipment manufacturing and design, specializing in digital video solutions, station automation, on-demand video, and remote equipment control. Setting standards in product affordability, reliability, and versatility, and leading in customer satisfaction, LEIGHTRONIX also offers a standard 5 year warranty and cost-free technical support for the life of its products. Clients include a wide range of corporate/industry, medical, educational, and government/military installations as well as local cable and broadcast television operations.
