- ◆ Support for Hundreds of Models from JVC®, Panasonic®, Pioneer®, Sony®, and Tascam®

Video/Audio Routing Switcher Control

- ◆ User-Defined Input/Output Aliases
- ◆ Support for Popular External Routing Matrices up to 250 Inputs by 250 Outputs

Remote System Access

- ◆ Access and Control via TCP/IP Network
- ◆ Manage Your System Operations from Anywhere your Network Extends, Including the Internet!

Experience the amazing versatility and powerful control features of the TCD/V3™. With the TCD/V3 as your system control center, multi-channel digital playback automation has never been easier or more affordable.

Managing multiple channels of digital program playback and recording is easy with the included network management software. A comprehensive resource library allows you to organize your digital and analog media resources while drag and drop scheduling eases the task of multiple playlist development. Scheduling problems are virtually eliminated as error checking and conflict reporting help you keep both your playback resources and your channels in order.

Backed by a five-year warranty and free online technical support, the TCD/V3 gives you the advanced system control you need for worry-free operation.
